Malang, Indonesia

SUMMARY

Computer Science student at Ma Chung University (Semester 5) with practical programming experience in Python, Java, and Lua. Skilled in logical problem-solving, algorithm design, and implementing functional solutions across various projects. Seeking internship opportunity in the technology sector to apply technical skills and contribute to innovative solutions.

EDUCATION

Ma Chung University / Informatics Engineering **2023 – Present**

SKILLS

English, Analytics, Communication, Creativity, Problem Solving, Python, Java, Lua, Office 365, Google Workspace.

WORK EXPERIENCE

Ma Chung University (Partner Program with Kalam Kudus Christian School) / Coding Instructor **February 2025 – Present**

- Manage 3 weekly programming sessions across two locations, working with 60+ participants in Python and Scratch environments
- Develop Python curriculum covering computer science fundamentals including data structures, algorithms, and programming logic
- Create game development projects using Scratch, implementing conditionals, state management, variables, and event-driven programming
- Debug and troubleshoot code issues across multiple projects, providing technical solutions and code reviews
- Evaluate technical projects as competition judge, assessing code quality, logic implementation, and functionality

PT Karya Warga Indonesia (Kawai Edu Lab) / Programming Instructor **June 2025 – Present**

- Conduct 6 hours of weekly programming work across Python, Lua (Roblox Studio), and Scratch platforms
- Completed 30+ functional projects across 25+ sessions, implementing various programming concepts and game mechanics
- Work with diverse codebases and programming paradigms, adapting solutions for different platforms and use cases
- Apply problem-solving methodologies to break down complex logic into implementable code structures
- Manage multiple concurrent projects while maintaining code quality and project completion timelines

ORGANIZATION AND VOLUNTEER EXPERIENCES

HMP TIF UMC / Treasurer **October 2023 – June 2025**

IT School work program:

- Coordinated technical workshop simulation involving 100+ high school participants, managing event logistics and resource allocation
- Collaborated with cross-functional team of 13 members to execute large-scale technical event from planning to implementation
- Presented computer science concepts and university program information to prospective students

Harmony IT work program:

- Led outdoor integration program for 24 informatics engineering students, managing end-to-end project execution
- Managed budget of IDR 3,130,000, negotiating vendor contracts and optimizing costs to achieve 53% reduction in participant fees
- Demonstrated project management and financial planning skills while coordinating multi-stakeholder events

Rotaract Club of Ma Chung / Member **January 2024 – October 2024**

- Contributed to Smile 3.0 blood donation event that achieved 110% increase in participation compared to previous year, collecting 33 blood units
- Managed event operations including venue setup, inventory management, and coordination with Red Cross department
- Analyzed participant data and success metrics, achieving 52.4% donor success rate from 63 registered participants

Ma Chung Festival / Health Division Comitte **September 2024 – October 2024**

- Managed health and safety operations for university festival serving 250+ new students
- Collaborated within 184-member team to develop and implement comprehensive safety protocols and emergency response procedures
- Coordinated medical resource procurement through vendor negotiations and maintained on-site medical support throughout events
